

KWS BONO

Hybrid Fall Rye

The Next Step in Hybrid Fall Rye

KWS Bono yields over 137%* of the checks and that's without additional fertilizer. It also has the hybrid advantage for improved grain quality for milling, distilling, fuel and feed. KWS Bono is truly the next step to achieving the highest returns in rye for grain production, we guarantee it!

Highlights

- Market-leading yields; up to 137%* of Hazlet
- Very good lodging resistance
- Short stature, easy to harvest
- Uniform maturity and grain sample for consistent grain quality
- Much higher falling numbers than conventional rye for improved milling access
- Excellent for livestock feed and ethanol

In 2018, FP Genetics will be offering farm customers a trial early order hybrid fall rye offer. Buy 10 units seed, get 1 unit seed free

Trial Offer Details:

1. Grower orders FP Genetics KWS Bono or KWS Gatano hybrid fall rye seed from their participating FP Genetics retailer by August 10, 2018.
2. Grower takes delivery of seed by September 15, 2018.
3. Grower receives 1 free unit seed for every 10 units seed purchased from their participating FP Genetics retailer.

KWS BONO - Hybrid Fall Rye

KWS BONO AGRONOMIC AND DISEASE DATA											
Variety	Yield (kg/ha)	Yield (% of Hazlet)	Protein %	Maturity (days)	Test Weight (kg/hl)	TKW (g)	Height (cm)	Lodging (1)	Winter Survival	Ergot (%)	Falling Number
Prima	4,902	81%	11.0	217	72.9	33.5	118.2	3.9	76.8	1.5	203.9
Hazlet	6,047	100%	10.4	219	73.9	37.6	107.6	3.0	87	1.9	151.8
Brasetto	7,343	121%	9.5	220	72.7	34.5	97.4	2.5	86.8	2	247.9
KWS Bono	7,919	131%	8.8	218	73.3	33.1	96.2	2.4	87.6	1.9	265.1

Lodging: scale of 1 - 9; 1 is best

Adaptability

KWS Bono hybrid fall rye is well suited to all the regions in Canada.

Insights

“Hybridization in rye is a major step forward in rye genetics in Western Canada. The yield potential from hybrid varieties like KWS Bono appears to be very high given decent conditions. A major step in yield potential is what rye needs to be a competitive cereal.”

- Lee Moats PAg, Farmer, Riceton SK

“We are really happy with its winter hardiness and standability. The KWS Bono was shorter than the Brasetto and was great to straight cut. The yield last year was 118 bushels per acre with good falling numbers. We are quite happy with the KWS Bono in our rotation.”

- David Hamblin, Red River Seeds Ltd., Morris MB

“KWS Bono hybrid fall rye is the market leader in cereal yields. What’s more, KWS Bono provides the highest returns per acre resulting in the lowest cereal feed cost on a per acre basis. Studies in Canada and around the world show hybrid fall rye is an excellent feed source for swine; cost effective ingredient, similar average daily gain and feed intake, improved herd health from high dietary fibre and fructane levels and improved carcass quality from less and firmer backfat.”

- Herman Wehrle, PAg.,
 Director of Market Development, FP Genetics Inc.
